This technical drawing shows a rectangular frame with internal wiring and components. The frame is composed of four vertical and four horizontal rails. Two electrical control units are mounted on the frame, one on the left and one on the right. A network of wires connects these units to various points on the frame, including the rails and internal cross-braces. The drawing includes dimension lines and labels, indicating the precise placement of the components and the layout of the wiring. The overall structure appears to be a specialized piece of equipment, possibly for material handling or industrial automation.
